

Full-Face Flange Protector Covers

Purpose: To protect flange faces from damage during shipping and handling.

Styles: Pressboard is our most economical flange protector cover. This durable flange protector comes standard with four fastener holes.

Plastic (high-density polyethylene) flange protectors are a weather resistant, extended service life alternative to pressboard. Plastic flange protectors come standard with four fastener holes.

Self-adhesive plastic (high-density polyethylene) discs are a convenient alternative to our standard pressboard or plastic covers. Simply peel the adhesive backing and apply to the flange face.
