

Closed Cell Sponge Flange Savers

- Purpose:** Installed between the made-up faces of API Ring Joint flanges to protect the faces of the flanges from corrosion.
- Construction:** Made with a complete set of bolt holes in order to facilitate ease of installation and proper fit.
- Thickness:** Standard thickness is 1/4". Thicker sponge is available at additional cost.
- Advantages:** An inexpensive way to protect the faces of made-up flanges. The Flange Saver eliminates the need to periodically reapply tape around flanged connections in order to exclude dirt, water, debris, etc.
- Temperature:** -40°F to +200°F
